

MUHAMMAD FIKRI AKBAR

Senior IT System Engineer / Tech Lead | .NET Core, React, Go, Azure DevOps | 10+ YOE Banking & Automotive

Sumedang, Indonesia | +62 878 2521 4929 | fikrisoftware@gmail.com | linkedin.com/in/mfa-muhammadfikriakbar

PROFESSIONAL SUMMARY

Result-oriented Senior Fullstack Engineer with over 10 years of experience in the banking and automotive industries, including 8 years building end-to-end systems for the highly regulated banking sector. Experienced in building fullstack applications spanning backend (.NET, Go, Node.js), frontend (React, Next.js, AngularJS), and mobile (Android), as well as managing CI/CD pipelines on Azure DevOps and Google Cloud Platform (GCP), and integrating core banking systems (Temenos T24). Certified in Banking Risk Management (Level 4). A go-to technical advisor for the team, known for weighing effectiveness, efficiency, and performance, delivering solutions that are not only functional but also fast and maintainable.

SKILLS

Architecture & Design: System Architecture, RESTful API Design, System Integration, Core Banking Integration (Temenos T24), Technical Documentation

Application Development & Engineering: Desktop Applications, Web Applications, Mobile Applications (Android), Web APIs, Web Services, Windows Services, Custom RPA (Robotic Process Automation) using .NET & Playwright, Vibe Engineering (AI-Assisted Development & Agentic Coding)

Languages & Frameworks: React, Next.js, TypeScript, JavaScript, Node.js, AngularJS, C#, ASP.NET MVC, ASP.NET Web API, .NET Core / .NET 8, Entity Framework, Dapper, LINQ, Go, Java, Kotlin

Databases: Microsoft SQL Server (query optimization, database management), PostgreSQL, MySQL, Oracle, MongoDB

DevOps & Cloud: Google Cloud Platform (GCP), Azure DevOps, GitHub / GitHub Actions, CI/CD Pipelines, Git, IIS, Windows Server, Unit Testing

Security & Risk Governance: API Security, Banking Risk Management (Level 4 Certified), Security Research (Bug Bounty)

Soft Skills: Problem Solving, Analytical Thinking, Leadership & Mentoring, Teamwork & Collaboration, Communication, Continuous Learning

PROFESSIONAL EXPERIENCE

Senior IT System Engineer (Fullstack Developer & DevOps)

March 2023 – Present

PT Bank Sahabat Sampoerna, Jakarta, Indonesia

National private commercial bank focusing on SME and consumer banking.

- Architected and implemented internal banking systems, including a Digital Sign System and e-KTP verification services processing tens of thousands of documents and identity verifications per month across business units.
- Co-built and maintained a cross-stack portfolio of 300+ internal applications and services with the team, spanning .NET, React, Next.js, Node.js, Go, and Android across backend APIs, frontend web apps, and mobile platforms, including custom RPA solutions built with .NET and Playwright that run automated banking-process checks every 15 seconds.
- Optimized deployment workflows by configuring server environments and managing dozens of automated CI/CD pipelines in Azure DevOps, reducing deployment time and manual release errors.
- Translated Functional Specification Documents (FSD) into technical solutions in collaboration with cross-functional teams, guiding 12-27 projects per year through SIT, UAT, and Go-Live phases.
- Performed code reviews and mentored 6-10 junior developers to maintain coding standards and system reliability.
- Served as the team's go-to advisor for complex technical issues, providing troubleshooting guidance and creative solution ideas across projects.

Senior IT System Analyst (.NET Developer)

February 2020 – March 2023

PT Bank Sahabat Sampoerna, Jakarta, Indonesia

National private commercial bank focusing on SME and consumer banking.

- Developed and maintained mission-critical banking web services and internal applications supporting daily financial operations.
- Led integration of third-party applications with the Temenos T24 core banking system and maintained 4 internal applications built on top of it, ensuring high availability, secure data exchange, and reliable interoperability.
- Modernized legacy systems by researching and adopting emerging technologies, improving performance and security.

IT System Analyst (Outsource .NET Developer)

July 2019 – January 2020

SIGMA Tech, Jakarta, Indonesia

IT consulting company providing outsourced software development services for banking clients.

- Delivered .NET backend solutions for banking clients with a focus on service stability and maintainability.
- Provided end-to-end technical support from development through post-production, resolving critical production bugs.

IT System Analyst (Outsource .NET Developer)

August 2018 – July 2019

PT Asian Technology Solutions, Jakarta, Indonesia

IT consultancy delivering software solutions for financial institutions.

- Built and maintained .NET web services and backend applications for banking clients.
- Supported system integration and troubleshooting across development, testing, and production environments.

Software Developer (.NET Developer)

March 2016 – June 2018

PT Clientsolve Mitra Solusi, Jakarta, Indonesia (placement at Toyota Astra Motor)

IT outsourcing firm; placed on-site at Toyota Astra Motor for automotive dealer system development.

- Developed the Dealer Management System (DMS) covering Sales, Demand Supply, and Framework modules using ASP.NET MVC and AngularJS, serving Toyota dealers across Indonesia.
- Engineered a custom security tool for Web.config encryption/decryption, strengthening application security standards.

KEY PROJECTS

- **Digital Banking Suite (PDAja.com & Loan Origination System):** Built Web APIs and Windows Services with C# and SQL Server to support digital lending and payment operations.
- **Dealer Management System (Toyota):** Developed core modules for automotive dealer management with a focus on scalability and user experience.
- **Security Research:** Identified and responsibly reported a privilege/logic flaw in administrative account reassignment to Meta through its bug bounty program.

CERTIFICATIONS

- Kualifikasi 4 Manajemen Risiko Perbankan (Banking Risk Management Qualification Level 4)
- MongoDB (3 certificates): Relational Model (SQL) to Document Model, CRUD Operations, Schema Design Patterns and Antipatterns Skill Badge
- Product Management Training Program (Certificate of Completion)

EDUCATION

Bachelor of Information Systems

2017 – 2021

Bina Nusantara University, Jakarta, GPA 3.53/4.00

Completed through an employee class program (kelas karyawan) while working full-time.

Diploma in Information Management

2011 – 2015

Telkom University, Bandung, GPA 3.49/4.00

LANGUAGES

English, Professional Working Proficiency | Indonesian, Native | Sundanese, Native
